Proof of Performance

LanTEK III | FiberTEK III
Certifier for Copper and Fibre Cabling
LanTEK III | FiberTEK III
Certifier for Copper and Fibre Cabling

The LanTEK III is an easy to use cable certifier that meets existing TIA and ISO/IEC performance requirements for testing up to Cat 6A/500MHz. FiberTEK III adapters are used with LanTEK III for fast and simple certification of high bandwidth single-mode and multimode fibre optic cabling including support for encircled flux testing.

Test data when you want it, where you want it
Using the free IDEAL AnyWARE app, field technicians can share test data with colleagues or customers without leaving the jobsite, resulting in greater collaboration, more on-time job completions and reduced costs.

New troubleshooting features that save time and money
Should a cable prove to be faulty, troubleshooting is easy with the introduction of Time Domain Return Loss (TDRL) and Time Domain Near End Cross Talk (TDNEXT) measurements.

To pinpoint fibre cabling faults every FiberTEK III adapter includes a built-in visible light source to help you visually pinpoint faults and locate fibre ports.

These additional features help locate hidden connections, splices and cable faults and can save many hours previously spent troubleshooting problems on the job.

New permanent link (PL) adapter saves money
New PL adapters reduce down time and lower maintenance costs with field replaceable RJ45 contacts that eliminate the need to replace the complete adapters. New PL adapters feature centred connectors to ensure compatibility with all brands of Cat6A/Class EA cabling solutions. The PL adapters use high performance, ultra-flexible cable that allows them to be used in confined spaces without damaging the PL adapter or the outlet being tested.

Modular solution to reduce capital costs
For many cable installers there is pressure to reduce capital equipment costs. The LanTEK III and FiberTEK III uniquely offer a pick and mix solution of components, therefore you only pay for what you need. This includes a wide range of test modules, accessories and Careplans to satisfy your specific requirements.

Permanent Link Testing Modules
To test and certify UTP/STP cabling from the patch panel to the work area outlet. The RJ45 contacts on the tip of the Permanent Link Modules are field replaceable to reduce the cost of ownership.

Channel Testing Modules
Select from a wide wide range of Channel testing modules for various applications including: RJ45, GG45, TERA and EC7.

Fibre Optic Testing Modules
FiberTEK III modules offer fast and simple Tier 1 certification of high bandwidth single-mode and multimode fibre optic cabling including support for encircled flux testing.

For a full list of the speciality testing modules including COAX, Alien Cross Talk and Industrial Ethernet please visit our website.
Efficient Data Management Software

IDEAL Data CENTER (IDC) is the free test result management software for the LanTEK III and FiberTEK III series of cable certifiers. IDC allows data cable installation professionals to easily download, manage, edit and print PDF reports. IDC offers a simple user interface with time saving features including:

- Microsoft ribbon toolbars for ease of use
- Only 4 button clicks to import data from the tester
- >10,000 results managed in a single job
- Professional reporting for your clients
- Ability to group and filter test results into categories including:
  - Test limits
  - Devices
  - Or any other data within the database

Professional Reporting

Automatically generate test reports in PDF or CSV format. The summary page of each report can be customised to include logo, company and operator details.

Choose between 3 different reports than can show either passed, failed or all test results in each report:

- Summary
- Brief
- Full
New Permanent Link (PL) adapter

Operates in the smallest enclosures
The PL adapters use high performance, ultra-flexible cable that allows them to be used in confined spaces without damaging the PL adapter or the outlet being tested.

Compatible with all RJ45 cabling systems
New PL adapters feature centred connectors to ensure compatibility with all brands of Cat6A/ISO Class E_A cabling solutions.

Field replaceable tips that reduce downtime and maintenance costs
New PL adapters reduce down time and lower maintenance costs with field replaceable RJ45 tips that eliminate the need to replace the complete adapters.
To reduce costs the PL adapter tips provide almost three times as many insertions than a regular patch cord before tip replacement is required.

Through innovative design, the entire worn plug assembly is replaced with a completely new plug, contact and locking mechanism.

The PL adapter tips can be changed in minutes with 3 simple steps shown below.

<table>
<thead>
<tr>
<th>IDEAL Networks’ PL adapter tip (independently verified)</th>
<th>Regular RJ45 patch cord plug rated by ISO/TIA standards</th>
</tr>
</thead>
<tbody>
<tr>
<td>Number of insertions before contacts are worn and replacement is required</td>
<td>2,000</td>
</tr>
</tbody>
</table>

Step 1
Remove screw

Step 2
Slide off the old tip and replace with a new one

Step 3
Replace screw
Send test data from anywhere using the free app

**Step 1**
Test
- Set up project
- Perform autotest on copper/fibre cabling

**Step 2**
Connect & Send
- Activate the LanTEK III wireless hotspot
- Connect your mobile device with the IDEAL AnyWARE app.
- Transfer test data to your mobile device
- Send data using email or your preferred file sharing app.

**Step 3**
Create PDF reports with IDC
- Receive test data on your PC via email or file sharing method.
- Analyse and process data
- Create PDF reports

Applications
Blue line indicates permanent link adapter.
New troubleshooting features that save time and money

Should a cable prove to be faulty, troubleshooting is easy with the introduction of Time Domain Return Loss (TDRL) and Time Domain Near End Cross Talk (TDNEXT) measurements. These additional features help locate hidden connections, splices and cable faults and can save many hours previously spent troubleshooting problems on the job.

TDX – Example: Consolidation Point

First Connector  Bad Connector  First Connector  Consolidation Point  Last Connector
Troubleshooting
Red laser light source to visually pinpoint faults and locate fibre ports

Protected test ports
Attached covers protect ports, minimise contamination and will not be misplaced

Certification
Tier 1 certification of single-mode and multimode fibre optic cabling

Encircled Flux compliance
Enables compliance to the new 2016 fibre standards IEC 14763-3 and ANSI/TIA-526-14-C (optional accessory – see back page for details)

Field calibration
Allows 1 and 3 jumper field calibration methods to ensure accuracy and compliance to IEC and ANSI/TIA standards

Simplified bi-directional measurements
Eliminates process of manually merging directional tests into one record

Complies with all international standards including TIA, ISO/IEC
See website for full details

FiberTEK III
Fibre certification wizard to simplify setup and testing

Setup Wizard
Select field calibration (1-Jumper|3-Jumper) and measurement modes (Loopback|Normal), (Uni-Directional|Bi-Directional).

Auto-test
Perform auto-tests using the intuitive graphical interface to reduce mistakes and ensure accurate certification results.

Review Results
Tier 1 certification results display:
• ISO/TIA/IEEE test standard
• Pass/Fail result
• dB loss of each fibre at each wavelength
• dB loss in each direction (when testing bi-directionally)
• Fibre link length
• dB margin / headroom

Supports all common connector types
SC, FC, ST adapters included. LC adapters optional
